For over 25 years, City Lifting has provided specialist lifting solutions and currently operates a fleet of over 70 tower cranes and 20 carefully chosen mobile cranes.

From our new location inside the M25 at Purfleet, Essex, we are ideally situated to provide a quick and efficient response to complicated lifting projects in London and the South of England.

Our specialist lifting crane division, operates light tower cranes and unusual machines for lifting otherwise impossible situations and methods.

**For more information, phone us on 01708 805550 or visit our website at [www.citylifting.co.uk](http://www.citylifting.co.uk)**

# LIFT – WITH THE CONFIDENCE OF A PROFESSIONAL AND DEDICATED TEAM.

Our modern, reliable and well maintained fleet are operated by a full complement of experienced, professional and dedicated operators. All our staff are fully trained to the highest quality levels with an emphasis on safety and efficiency. Our Health & Safety standards are constantly reviewed to meet current UK and European legislation.

Our unique approach to specialist crane hire means we are able to offer everything from self-drive crane hire for straightforward jobs, right up to our **COMPREHENSIVE CONTRACT LIFTING SERVICE** for the largest and most complex projects... and everything in between. 24 hours a day, 364 days a year.

All our machines can be hired with an operator under your own risk, planning and control or, alternatively, we can offer a **COMPREHENSIVE CONTRACT LIFTING SERVICE** specific to your requirements. This complete service undertakes the entire lifting programme from planning to all-risk insurance, coupled with providing all the necessary personnel to get your project completed quickly, efficiently and on time.

## CITY LIFTING'S COMPREHENSIVE CONTRACT LIFTING SERVICE INCLUDES:

- On-site inspection
- Job planning
- Risk assessment
- Risk management
- Insurance
- Method statements
- All permits
- Road closures and traffic management
- Liaise with local authorities and relevant parties
- Transportation
- Specialist equipment including lifting tackle.

**15** MINUTES

# SPIERINGS MOBILE CRANES GET READY TO WORK IN FIFTEEN MINUTES

**LIFT IN NARROW STREETS WITH SPIERINGS SPECIALIST MOBILE TOWER CRANES.**

The ideal city cranes, our revolutionary Spierings, folding, mobile cranes far out-perform standard telescopic cranes, providing a more practical, quicker and cost effective solution. They combine the features of a telescopic crane with those of a conventional tower crane in one machine, giving greater reach and versatility. Any of our 14 Spierings cranes can be hired for more specialised jobs throughout the UK.

These cranes are capable of working on two or three sites a day if required.

**Key advantages:**

- Faster set-up time – just 15 minutes
- Can be set up in narrow roads
- Reaches places other cranes cannot
- No standoff distance
- Greater safety – the operator can always see the load
- Able to fit on smaller areas on site for given capacity
- Very quick, efficient and productive working
- Compact for their lifting capacity
- Lower outrigger loadings for given capacity
- Flood lights and quiet operation for night working
- Lifts up to 10 tonnes
- Fantastic reach over buildings 1.7 tonnes at 60m.

LIFT THE MOST COMPLEX OF PROJECTS WITH OUR VAST RANGE OF STATIC TOWER CRANES.

No two projects are the same. That's where our expertise, knowledge and experience can help you overcome even the most complex of issues.

Key advantages:

- Large fleet
- We are able to cater for every difficult city application
- Options include:  
Saddle jib  
Luffing jib and folding jib, ideal for applications where airspace problems are an issue
- We can offer assistance with planning
- We can offer advice on the most effective way to complete even the most complex of projects.

LIFT SMALL JOBS, COST EFFECTIVELY, WITH OUR SELF-ERECTING TOWER CRANES.

Our fleet of self-erecting, self-drive, tower cranes are ideally suited to the smaller scale building project and offer considerable advantages over the more conventional methods.

Key advantages:

- Radio controlled
- Minimal ground preparation required
- Saves mobile crane visits
- Saves concrete pump visits
- Puts materials where required
- Less material wastage
- Quiet, efficient working
- Lifts up to 6 tonnes
- 1 tonne lift at 40m radius.

LIFT HEAVY OR HIGH WITH MOBILE TELESCOPIC CRANES.

Our modern, comprehensive fleet ranges from 10 to 100 tonnes capacity and can be hired either via CPA Hire or Contract Lift Hire. Our expert staff can match exactly the right machine for your specific project and help overcome any complex issues.

We can also offer a complete transport and lifting service, whereby customer's goods can be picked up from supplier, delivered to site and lifted into position.

Key advantages:

- All our operators are fully experienced with an emphasis on safety and efficiency
- Lift up to 100 tonnes
- Height up to 83 m
- Up to 62 m radius
- CAD drawings available
- Large outrigger mats available

- Complete transport and lifting service
- City and Iron Fairy cranes, for restricted space and factory work
- Manitex boom truck with no tail swing, ideal for city work.

# LIFT WITH COMANSA CRANES FOR SALE OR HIRE.

We can now provide the full range of Comansa cranes, for sale or hire, throughout the UK. Comansa cranes are well engineered, fast, powerful and virtually silent in operation.

The original range of 'flat-top' cranes utilise the latest mechanical and electrical systems, which reduce power demand and allow for smoother operation.

For working in "tight" sites, Comansa tower cranes have the capability of reducing jib lengths by 2.5m increments.

**Key advantages:**

- Smaller cranes are driven by radio control and are a good alternative to self-erecting cranes
- Larger cranes are very powerful and productive, ideal for large projects
- Once driven, crane operators wouldn't want to drive anything else!

## LIFT FROM THE TOP OF THE TALLEST BUILDINGS WITH OUR VC 20 MINI-LUFFING CRANE.

This versatile crane breaks down into small pieces of a maximum weight of 120 kg and can be taken in a lift and hand assembled on the roof of the tallest buildings. It can also be used to supplement larger tower cranes where hook time is limited and is ideal for glass and finishing projects after the main tower crane has been dismantled.

**Key advantages:**

- Roof mounting crane
- No road closures needed
- Radio controlled
- Takes up no room on the ground
- Can be carried to the roof in a standard lift
- Works like a temporary tower crane
- Erected by hand or by mobile crane
- Spectacular 850 m rope capacity
- Lifts up to 7 tonnes
- 1 tonne lift at 20 m radius.

## LIFT IN IMPOSSIBLE LOCATIONS WITH OUR FERRO MINI TOWER CRANES.

Our fleet of Ferro mini tower cranes provide the ideal solution where insufficient access would normally be a problem. They are currently being used for the regeneration programme starting with Brighton and Cromer piers.

**Key advantages:**

- Can be transported, erected and ready to work in virtually any location
- Erected by hand or by mobile crane
- Can provide additional hook time under busy tower cranes
- Ideally suited for curtain walling and glass
- Lifts up to 1.3 tonnes
- 0.75 tonne lift at 17.5 m radius
- Radio controlled.

## LIFT IN PLACES NO OTHER CRANES CAN REACH WITH MINI CRAWLER CRANES.

Our fleet of mini crawler cranes can work in the smallest of areas. They are ideally suited for refurbishment, fitting out and maintenance operations. The perfect tool for lifting inside buildings, due to their light weight and manoeuvrability.

**Key advantages:**

- Radio controlled
- Lift up to 4 tonnes
- Dual powered diesel or electric, for working in environmentally sensitive areas
- Silent operation when using electric power
- Helps contractors meet the needs of the 'Manual Handling Regulations'
- Up to 16 m boom length
- Available as contract lift, crane hire or machine only.
